

MEET THE CONSTRUCTOR EVENT INVITATION

The event brings together local businesses, job seekers and senior project representatives from AGL Energy (AGL), GE and CATCON to learn about the opportunities on the Coopers Gap Wind Farm following the recent achievement of financial close. This will provide an opportunity for businesses and job seekers to meet key project personnel with responsibility for the design of the wind farm, sourcing business solutions, purchasing goods and services.

This Meet the Constructor event will focus on a range of materials, goods and services that will need to be procured during the construction phase of the Coopers Gap Wind Farm Project.

GE, the world's digital industrial company and Australian civil engineering construction company, CATCON, have been awarded the contract to design and construct the 453 MW Coopers Gap Wind Farm project at Cooranga North, approximately 250 kilometres north west of Brisbane. The project will be the largest wind farm in Australia on completion. GE and CATCON are strongly committed to working with Australian and local businesses and organisations to deliver local employment and supply chain opportunities. Senior representatives from AGL, GE and CATCON bring this event to the local Dalby and Kingaroy communities, so come along and meet with representatives to investigate how you or your business can be part of the Coopers Gap Wind Farm Project.
